Graphene and its unique properties

Prof. Francisco Guinea López
Instituto de Ciencia de Materiales
CSIC

Graphene, two-dimensional membrane one atom thick, is a novel material which shows features not found previously in other systems. Some of these properties, along with the research effort which is being carried out in order to elucidate their origin and consequences, will be reviewed.

Miércoles, 16 de Febrero de 2011, 12:00 horas.

Sala de Conferencias. Centro de Física "Miguel A. Catalán".

Serrano, 121. 28006 Madrid.
